

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE AMERICAN NATURALIST

A MONTHLY JOURNAL
DEVOTED TO THE NATURAL SCIENCES
IN THEIR WIDEST SENSE

CONTENTS

	PAGE
I. Notes on European Museums O. C. FARRINGTON	763
II. On Some Changes in the Names, Generic and Specific, of Certain Fossil Fishes O. P. HAY	783
III. The Utility of Phosphorescence in Deep-Sea Animals . . . C. C. NUTTING	793
IV. A New Hydroid from Long Island Sound C. P. SIGERFOOS	801
V. A Balloon-Making Fly J. M. ALDRICH and L. A. TURLEY	809
VI. Have we more than One Species of <i>Blissus</i> in North America? F. M. WEBSTER	813
VII. Synopses of North-American Invertebrates. IV. Astacoid and Thalassinoid Crustacea J. S. KINGSLEY	819
VIII. Reviews of Recent Literature: <i>General Biology</i> , Action of Salt Solutions upon Eggs, History of the Natural Sciences — <i>Anthropology</i> , The Races of Europe, Anthropological Notes — <i>Psychology</i> , Psychology of Para- mecium — <i>Physiology</i> , Ocular Changes Induced by Low Temperature, Birch's Physiology, Formation of Fibrinogen — <i>Zoölogy</i> , The Rotifera, Segmentation of Insect Head, The Optic Nerves of Amphibians, Notes	825
IX. News	839
X. Correspondence	843
XI. Publications Received	844

THE AMERICAN NATURALIST is an illustrated monthly magazine of Natural History, and will aim to present to its readers the leading facts and discoveries in Anthropology, General Biology, Zoology, Botany, Paleontology, Geology and Physical Geography, and Mineralogy and Petrography. The contents each month will consist of leading original articles containing accounts and discussions of new discoveries, reports of scientific expeditions, biographical notices of distinguished naturalists, or critical summaries of progress in some line; and in addition to these there will be briefer articles on various points of interest, editorial comments on scientific questions of the day, critical reviews of recent literature, and a final department for scientific news and personal notices.

All naturalists who have anything interesting to say are invited to send in their contributions, but the editors will endeavor to select for publication only that which is of truly scientific value and at the same time written so as to be intelligible, instructive, and interesting to the general scientific reader.

All manuscripts, books for review, exchanges, etc., should be sent to THE AMERICAN NATURALIST, Cambridge, Mass.

All business communications should be sent direct to the publishers.

Annual subscription, \$4.00, net, in advance. Single copies, 35 cents.
Foreign subscription, \$4.60.
